What Is Chiapas EDI Enterprise?

Chiapas EDI Enterprise is an integration middleware platform, focused on enabling enterprises to work directly with electronic data interchange transaction sets that HIPAA law mandates for the healthcare industry. It is composed of:

- ⇒ **Chiapas Studio** - This built-in interactive studio application enable users to develop new integrations processes and diagnose EDI file issues.
- ⇒ **Core Translation Engine** - Underlying all of Chiapas EDI's translation capabilities, the core engine is capable of freely translating EDI files to and from CSV files, SQL Database tables, or XML files as well as generate fill SNIP Type 1 and 2 integrity reports.
- ⇒ **Automation Engine** - Using simple, "snap-together" activities, Chiapas EDI Enterprise provide a toolbox for users to create full-featured business processes that integrate their EDI workflow with the rest of their business environment through SecureFTP, Email, and more.
- ⇒ **Documentation** - Beyond the basic video tutorials, Chiapas EDI Enterprise has a manual that covers every feature of its engine environment

Unique Features of Chiapas EDI Enterprise

Out of the box. Chiapas EDI Enterprise is capable of rendering arbitrary HIPAA transactions directly to a SQL table, or CSV or XML file without setup or writing a line of code

Powerful Front-end Interface. A powerful Chiapas Studio front-end provides an interactive interface to developing EDI mappings and transactions, expediting the development process

Powerful Decoding Engine. Chiapas EDI Decoding Engine is able to decode a 400MB file or even bigger within 8 minutes in a given 3.5 GHz Xeon CPU workstation

Automation. Chiapas EDI Enterprise provides the capabilities to create fully automated solutions with a graphical drag-and-drop interface, including modules to control translation, E-mail notifications, logging, and SQL operations

Empowering Your In-House IT Resources. Since Chiapas EDI Enterprise is capable of integrating EDI directly into SQL Server database tables, it empowers your in-house IT staff to develop and maintain EDI processes easily with their existing SQL skills

NoSQL Compatibility. Chiapas EDI Enterprise's native XML functionality enables it to work directly with non-relational databases, such as MarkLogic

What specifications does Chiapas EDI Enterprise support?

Supporting virtually every X12 4010 and 5010 specification, Chiapas EDI Enterprise seamlessly integrates EDI into an enterprise database, translating EDI transactions instantaneously.

Benefits of Chiapas EDI Enterprise

- Optimize your healthcare business operations
- Accelerate your B2B communications
- Adapt quickly to a changing business environment
- Open your enterprise to new lines of business
- Bring HIPAA Compliant transactions in house
- Use your own IT staff to fulfill EDI functions

Regardless of what role you play in the healthcare industry, Chiapas EDI Enterprise can bring reliable EDI integration solution to your business. Having Chiapas EDI Enterprise in house, you can save time, save money, and secure your PHI data.

Does Chiapas EDI Enterprise support ICD-10?

Yes. It does. See the Chiapas EDI Enterprise Manual for more details.

Is Chiapas EDI Enterprise A Hosted Solution?

No. Chiapas EDI Enterprise is not a hosted solution. Chiapas EDI Enterprise does not make any internet connections or has any internal update mechanism. It does not perform any activities outside of the scope of its default installation unless given workflows that instruct it to do so by the Licensee's implementation team.

Who Can Use Chiapas EDI Enterprise?

- Managed Care Payers
- Healthcare Providers
- Health Insurance Exchanges
- Benefits Administrators
- Healthcare Information Systems Vendors
- Any enterprises looking for the most efficient EDI platform to translate all ASC X12 HIPAA transactions with the least development time.

Made for healthcare IT professionals, Chiapas EDI Enterprise leverages technology to simplify the development process and empowers the IT staff to focus on business requirements and data instead of the complexities of EDI.

What Our Current Customers Say About Chiapas EDI Enterprise

"The Chiapas 2014 is an excellent tool to help create end user visibility in the world of EDI processing. This product provides a platform that parses EDI files into manageable reporting formats in just a matter of minutes. I look forward to working with Chiapas to utilize full automation in the sending/receiving of EDI files to our B2B partners. I highly recommend this product to any enterprise business that deals with EDI processes as part of their business model."

Troy C., Finance IT Support Manager, Monarch

"We have been using the Chiapas Enterprise 2014 product for about 3 months now, and we have been thoroughly impressed with the software and the support at every turn...From an administration process, Chiapas is a breeze. It quickly and easily installs and is up and running in literally only a few minutes."

Ray S., EDI Developer, InsureMonkey

"I found Chiapas EDI easy to install and intuitive to use. The software got us up and running quickly and was able to handle the latest 837 5010 transactions without incident allowing us to concentrate on analyzing the data rather than managing the software. I also found Chiapas EDI support to be extremely responsive when I needed it."

Alan L., CIO, prnLink
